Cdemo Postman Collection Import

Importing for the first time

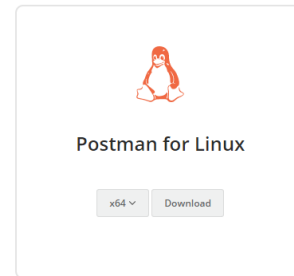

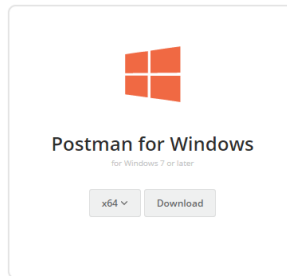

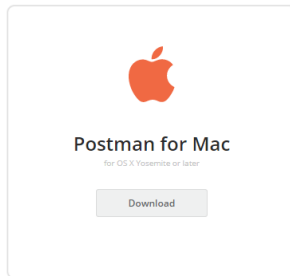

1. Download the latest cdemo Postman collection file
IDSCoreExternalApi.CDEMO.Postman_Collection.json from developer.ids-astra.com

2. Download and install the latest version of the native **Postman** app from www.getpostman.com/apps

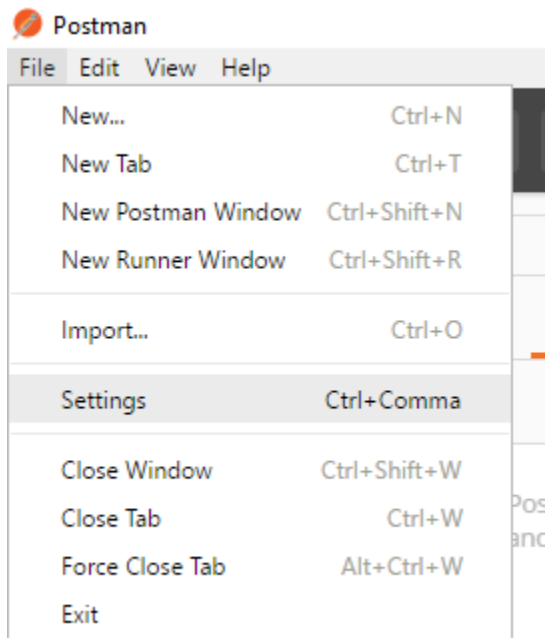

NATIVE APPS

Choose your platform:

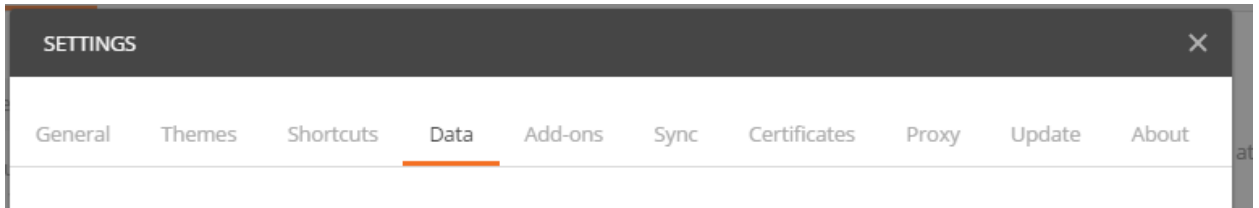

3. Launch Postman.

Click **File** -> **Settings** (or press Ctrl + comma)

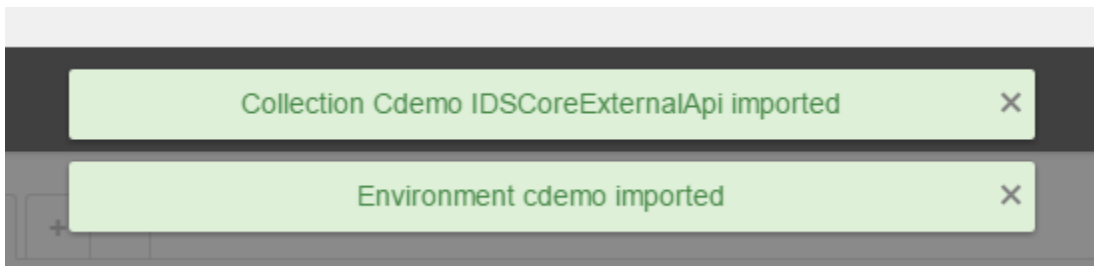

4. Import the data file.
Click the **Data** tab

Under **Import data**, click **Choose Files**.

Select the file `IDSCoreExternalApi.CDEMO.Postman_Collection.json` you downloaded in Step 1.

Postman should import an environment called **cdemo** and a collection called **Cdemo IDSCoreExternalApi**

5. Restart Postman
This is necessary sometimes for the import to take effect.

6. Specify your ClientID

Click the gear icon to launch the Manage Environments window.

Click **cdemo**

cdemo

Enter your issued ClientID into the **ClientID** environment variable:

Edit Environment

cdemo

	Key	Value	Bulk Edit
<input checked="" type="checkbox"/>	EnvironmentName	cdemo	
<input checked="" type="checkbox"/>	baseUrl	https://mb3.integrateddealersystems.com/IDSCore...	
<input checked="" type="checkbox"/>	ClientID	<<Specify Client ID>>	X
<input checked="" type="checkbox"/>	AccountID	410	

For example: if your ClientID was WXFjUA2LLWLvzGZI05hrDrEyJa9Obkeg enter it like so

Note: this is just an example, not a valid ClientID

Edit Environment

cdemo

	Key	Value	Bulk Edit
<input checked="" type="checkbox"/>	EnvironmentName	cdemo	
<input checked="" type="checkbox"/>	baseUrl	https://mb3.integrateddealersystems.com/IDSCore...	
<input checked="" type="checkbox"/>	ClientID	WXFjUA2LLWLvzGZI05hrDrEyJa9Obkeg	
<input checked="" type="checkbox"/>	AccountID	410	

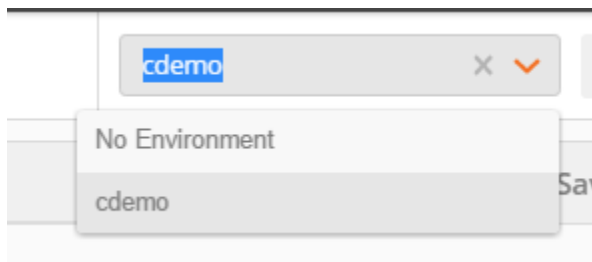

Click **Update**

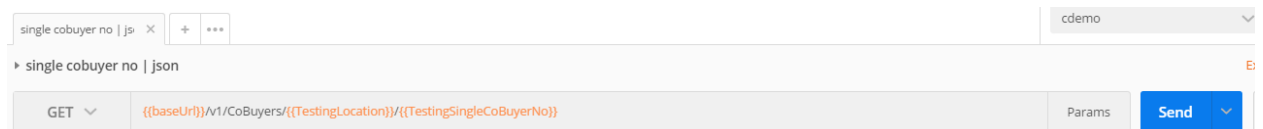

Close the Manage Environments window.

7. Send a request.

Choose **cdemo** as the active environment

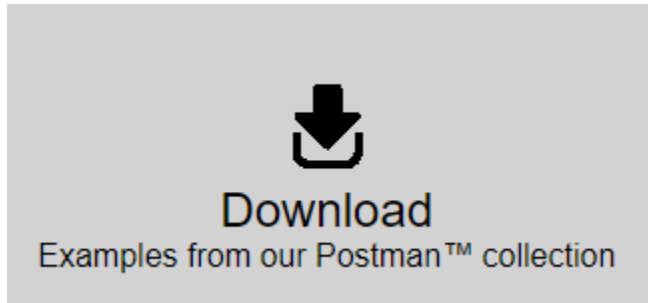

Choose a request from the collection and click **Send** to send it.

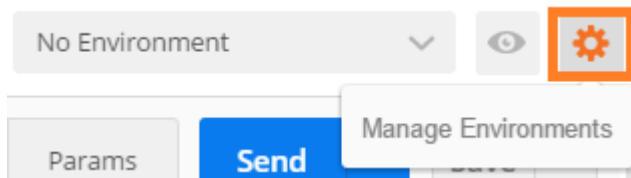

Importing an updated collection

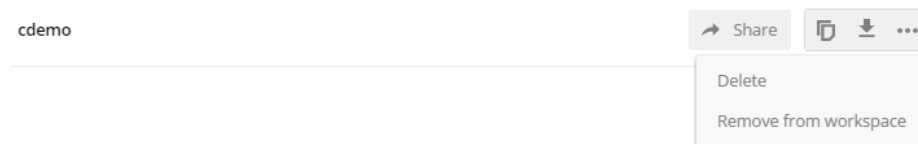

1. Download the latest cdemo Postman collection file
IDSCoreExternalApi.CDEMO.Postman_Collection.json from <http://developer.ids-astra.com/>

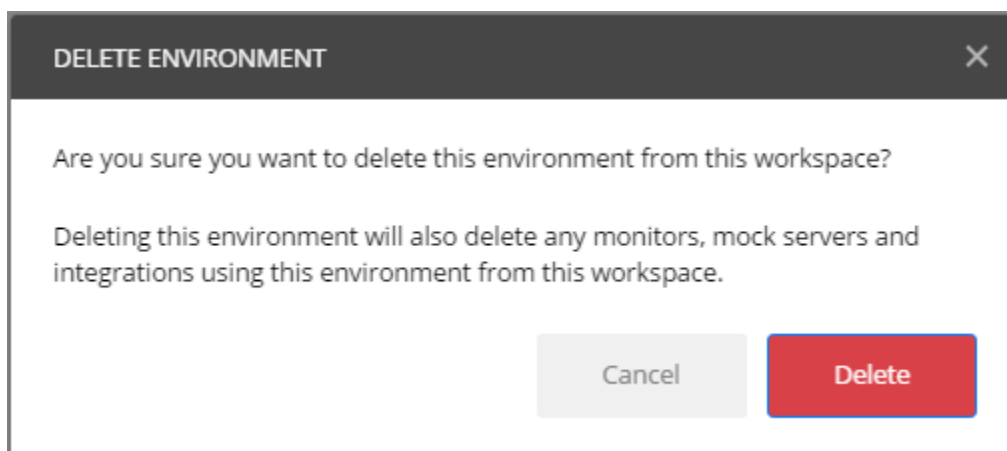

2. Launch Postman.
3. Remove the existing cdemo environment.
Click the gear icon to launch the Manage Environments window.

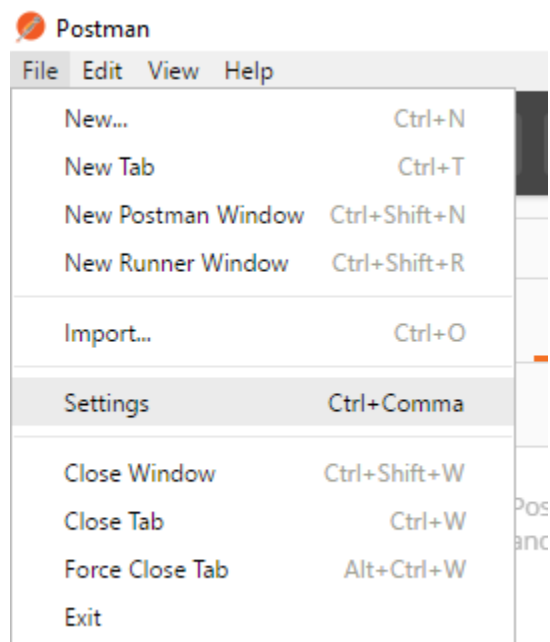

Under the **cdemo** environment, click the ellipsis icon and choose **Delete** to delete the existing environment.

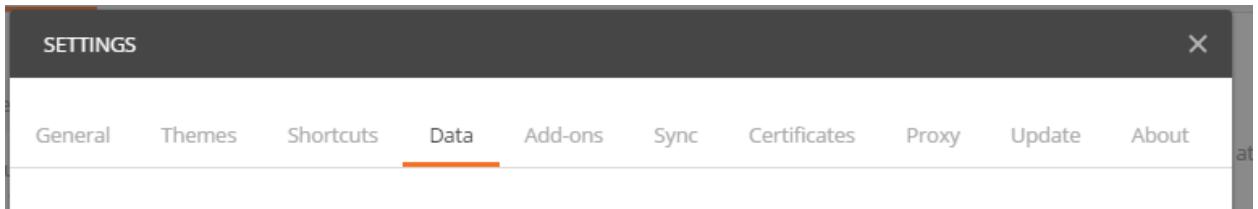

Postman will ask you to confirm. Click **Delete**.

Close the Manage Environments window. Click **File** -> **Settings** (or press Ctrl + comma)

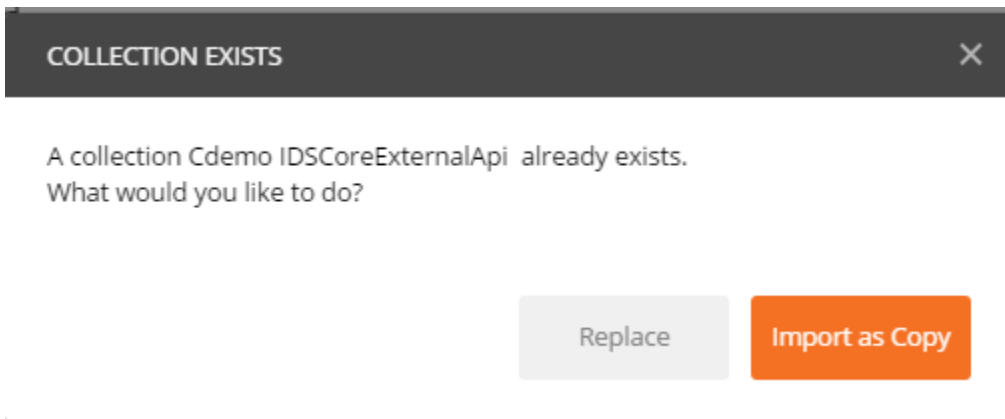

4. Import the data file.
Click the **Data** tab

Under Import data, click Choose Files. Select the file IDSCoreExternalApi.CDEMO.Postman_Collection.json you downloaded in Step 1.

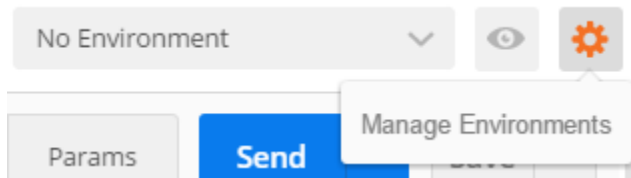

Postman will prompt you with a message saying the collection already exists. Click **Replace** to replace it with the new version.

5. Restart Postman
This is necessary sometimes for the import to take effect.

6. Specify your ClientID

Click on the **Manage Environments** button

Click **cdemo**

cdemo

Enter your issued ClientID into the **ClientID** environment variable:

Edit Environment

cdemo

	Key	Value	Bulk Edit
<input checked="" type="checkbox"/>	EnvironmentName	cdemo	
<input checked="" type="checkbox"/>	baseUrl	https://mb3.integrateddealersystems.com/IDSCore...	
<input checked="" type="checkbox"/>	ClientID	<<Specify Client ID>>	X
<input checked="" type="checkbox"/>	AccountID	410	

For example: if your ClientID was WXFjUA2LLWLvzGZI05hrDrEyJa9Obkeg enter it like so

Note: this is just an example, not a valid ClientID

Edit Environment

cdemo

	Key	Value	Bulk Edit
<input checked="" type="checkbox"/>	EnvironmentName	cdemo	
<input checked="" type="checkbox"/>	baseUrl	https://mb3.integrateddealersystems.com/IDSCore...	
<input checked="" type="checkbox"/>	ClientID	WXFjUA2LLWLvzGZI05hrDrEyJa9Obkeg	
<input checked="" type="checkbox"/>	AccountID	410	

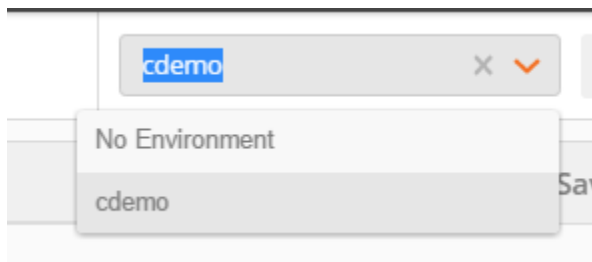

Click **Update**

Close the Manage Environments window.

7. Send a request.

Choose **cdemo** as the active environment

Choose a request from the collection and click **Send** to send it.
